#### **Extra Activities**

## Lego Challenge

Make and design an animal.

## **Active Challenge**

## Mindfulness Challenge

The body scan is a key practice in mindfulness, and an easy one to teach to children.

- Have your kids lie down on their back on a comfortable surface and close their eyes;
- Then tell them to squeeze every muscle in their body as tight as they can.
- Tell them to squish their toes and feet, squeeze their hands into fists, and make their legs and arms as hard as stone;
- After a few seconds, have them release all their muscles and relax for a few minutes;
- Encourage them to think about how their body is feeling throughout the activity (Roman, 2015).

This simple exercise gets kids to be more aware of their bodies and helps them find a way to be present in the moment.
